This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

SPECIAL BIBLIOGRAPHY, No. 1.

COMPILED BY MADELEINE W. MILNER.

WOMAN AND CHILD LABOR.

Child labor has been the cause of much discussion and legislation abroad, but it was not until the census of 1870 called attention to its existence in the United States that any public notice was given to the subject in our own country.

This bibliography is confined to the United States to aid the investigator by separating the very meager American literature of the subject from the large mass of English and foreign publications.

The compiler soon discovered that the larger and by far the most valuable part of the material was contained in the reports of the labor bureaus and factory inspectors of the different states.

In addition to these, references found in periodicals and in a few books have been given.

No attempt has been made to refer to the brief mention of the subject found in the general books on the labor question.

The references found in the Analysis and index of all reports issued by bureaus of labor in the United States prior to November 1892, the third special report of the United States department of labor, were taken as a basis for the work, and brought down to date whenever practicable.

The list cannot claim to be complete, even in its very limited range, as it was impossible to obtain access to some of the most valuable reports.

The mine inspectors' reports and the State Census would, doubtless, contain material, but they were not accessible.

BIBLIOGRAPHY OF SOCIOLOGY.

SCIENTIFIC STUDY OF PHILANTHROPY.[1]

THE discovery of the scientific method of determining truth and the application of this method in the study of the social organism, together with a strengthening of the humanitarian sentiment, have developed in the latter half of this century what is known as the "new philanthropy." Charity has been, through all the ages past, largely selfish and sentimental. In its highest type it was based on the impulse to save one's self from the pain of seeing others suffer. Perhaps the social settlement expresses more perfectly than any other modern movement the tendency of the new philanthropy. As distinguished from the older form, which relieved suffering without regard to the effect on society, the new philanthropy is characterized by two tendencies: (1) a spirit of friendliness; "not alms, but a friend;" (2) a scientific study of philanthropy; "information before reformation."

This scientific study of philanthropy implies:

1. The scientific spirit. An open mind and a single purpose to find the truth.

2. The scientific method.

(*a*) Careful investigation of all the facts.

(*b*) Coördination of the facts; *i. e.*, placing them in their real relations.

(*c*) A determination of underlying general principles.

(*d*) The application of these principles to local conditions.

Many possessed of the charitable impulse are repelled by the term "scientific philanthropy." Scientific study of human beings implies to them an unsympathetic study. They object, and rightly, to putting impulse in "cold storage." But the term is used in this paper as including the spirit of friendliness essential to the student who would understand human beings as men and women who hope, suffer, and wish they had never been born. It is a superficial science that knows the environment and habits of "cases," but not the hearts of the poor. The term "scientific philanthropy" is for those who understand its full meaning an adequate and inspiring term.

It is not strange that men and women of noble ideals and of singular ability and training have given their lives to the study of the new philanthropy, nor is it strange that a large number of women are delighted to
